

**Kenko
Tokina**

**With state of the
art optical devices.
With
uncompromised
quality.**

Kenko Tokina Co. Ltd.

- Established in 1957 in Japan.
- Based on advanced optics technology, we have been providing a variety of products that meet customer needs globally, focusing on optical products such as optical filters, interchangeable lenses for cameras, binoculars, rifle scopes and astronomical telescopes.

Kenko Tokina Co. Ltd.

- In addition to consumer optics, KENKO continues to innovate and grow by actively expanding its business into a wide range of industrial fields, including medical, healthcare, cinema and broadcast lenses, security and machine vision lenses, and made-to-order glass aspheric lenses.
- Our lenses are being used at Narita, Haneda and other many major airports and Hollywood.

KENKO expansion to the Philippines

- KENKO established a factory in Cebu in 1989.
- The KENKO Philippine factory started with a small production of binoculars with 20 employees for only assemblies
- Currently, KENKO Philippines has around 1200 employees
- In addition, KENKO invited its Japanese suppliers to establish their own factories in Cebu. Presently, KENKO and its suppliers have a combined 10,000 workers in Cebu
- KENKO also acquired a new factory and is still growing.

Production in the Philippines

- Lens production, machining production and assembly.
- KENKO utilizes Philippine suppliers.
- KENKO's customers are eager to purchase from the Philippines instead of China.

The partnership of KENKO and ADAC successfully supplied and delivered 2,031 sets of brand new military binoculars to the Philippine military sometime on October 2021.

KENKO and ADAC had conducted a proof-of-concept (POC) with its Long Distance Camera for the Panglao International Airport in Bohol

KENKO and ADAC are in the final planning stages of establishing a manufacturing / assembly facility in the Freeport Area of Bataan
